

From [unclear]

November 30, 1964

Mr. D. M. Wear, Superintendent
L & N Railroad Company
Room 308, Union Station
Nashville, Tennessee

Dear Mr. Wear:

The Tennessee Stream Pollution Control Board held its regularly scheduled meeting on November 20, 1964. The purpose of this meeting was to discuss water pollution control and related problems in Tennessee.

Plans for waste disposal facilities leading to the correction of the stream pollution problem in Brown's Creek have been approved.

The Board considered water pollution as it relates to industrial waste from the railroad yards and after careful consideration adopted the following resolution:

"That the officials of the L & N Railroad Company, Radnor Yards, Nashville, Tennessee, proceed with the construction of industrial waste disposal facilities. The proposed facilities must be placed in effective operation on or prior to January 1, 1965, or the Board shall have no choice other than to proceed in accordance with the statutes."

Yours very truly,

S. Leary Jones, Executive Secretary
Tenn. Stream Pollution Control Board
